

Uniset II Connector

Plastic 6/3 litre Dual Flush Cistern, Seat and Connection Plate

The **Uniset II** is a mid sized modern styled cistern designed for retrofit installations. The **Uniset II** cistern is a two button, dual flush integrated system comprising of cistern, seat and flush fitting connection plate which conceals the flush pipe and water connection. This versatile 6/3 litre dual flush cistern can be converted to 4.5/3 and 9/4.5 litre with the benefit that the matched suites are suitable for multi purpose applications and can be used where authorised for septic installations.

Cistern: Is a one piece injection moulded tank with a well fitting removable lid housing and centrally positioned push buttons.

Cistern Mechanism: The cistern incorporates a quiet inlet valve to reduce noise during the filling cycle. The dual flush outlet valve is operated by two clearly marked push buttons which offer the choice of half flush or full flush as required.

Inlet and Overflow: Inlet is in the RH position and is located on the underside of the cistern and is interchangeable. Overflow is internal as standard, external overflow kit available.

Installation: Refer to *Important Information for Plumbers* section.

Colours: White and Ivory.
